www.kto.dev 

Software engineer with full stack experience and a focus in web application development including frontend development, backend development and database management.

## Skills

### Soft Skills

- Constructive Feedback
- Problem Solving
- Critical Thinking
- Team Management

### Languages

- JavaScript
- TypeScript
- C#

### Frameworks

- React
- Angular
- NestJS/Express
- .NET

### Other

- REST Architecture
- Node.js
- SQL & NoSQL
- Git

## Experience

SEP 2021 – MAY 2022

### Software Development Intern / CallMiner

I worked on a small team to develop a scheduling application using Angular, .NET, and MongoDB. We adhered to agile methodologies and used Jira for project management. Work included regular standup meetings and meetings with project stakeholders to elicit and manage requirements and make design decisions.

## Education

MAY 2022

### B.S. Software Engineering / Florida Gulf Coast University

## Key Projects

### FloriNouns / Sponsored by FGCU

**Technologies Used:** React, Web3.js, Fatoria F0, Ethereum

FloriNouns is an FGCU affiliated NFT collection with transactions supporting a university managed DAO. On this project, I helped deploy the collection's smart contract and lead the development of a decentralized app.

### Activity Calendar / Inclusion UI

**Technologies Used:** VanillaJS, Electron, Node.js, SQLite

Inclusion UI is a volunteer development organization whose goal is to create applications for users with learning disabilities. I helped develop a desktop calendar app to facilitate communication from nonverbal individuals.

### Neurologica VR

**Technologies Used:** Unity, Express.js, Node.js, MongoDB

Worked with another developer to create an educational virtual reality application which communicated with a Node.js server application.
